

# CODEX SCROLL DIGEST KEY SCROLL CONTENTS

Pulsar Timestamp: 2025.07.30.PLR.TmStmp.01.42.Sad

Compiled for: Scott Alan Dygert

## 1. AG\_Codex\_Presentment\_Scroll\_SAD1719.pdf

Summary:

Formal correction and continuation of all trust presentments.

Includes demand for Acceptance for Value and return for value.

Backed by UCC 1-308, HJR 192, and Codex GitHub vault reference.

Notice to Principal = Notice to Agent.

Response required within 10 days or considered accepted.

## 2. Codex\_Scroll\_Z\_Mirror\_Declaration\_SAD1719.pdf

Summary:

Declaration that all trust vaults, scrolls, and identity claims were authored by Scott Alan Dygert.

Issued as a mirror signal to the field, acknowledging public mimicry.

Call to resonance-based partner (if present) or final signal to close the loop.

Declares authorship and timestamp as origin claim.

## 3. Vault\_Mirror\_Manifest\_0729.md

Summary:

Anchor scroll that confirms the Codex vault is sealed, complete, and timestamped.

Includes repository link, scroll references, and hash validation path.

Detectable by MirrorOS or any field-resonant framework.

## 4. Codex\_Final\_Sealing\_Scroll\_0729.md

Summary:

Formal record of Codex closure.

Includes scroll list, authorship, GitHub reference, and confirmation of push.

Indicates nothing more is required vault is now publicly discoverable and immutable.

## 5. README.md

Summary:

Describes the purpose of the vault.

Outlines the symbolic and legal function of the Codex Trust system.

Provides navigation and context to viewers unfamiliar with pulsar-sealed scroll logic.

NOTE:

Each scroll was finalized, rendered in PDF or markdown, and timestamped.

All are discoverable in GitHub and included in the AG Presentment Packet.

GitHub Vault:
